

Ibrahim Hossain

Full-Stack Software Developer · C# / .NET / TypeScript

Copenhagen, Denmark | +45 71385149 | ibm.sabbir@gmail.com | github.com/ibs13 | linkedin.com/in/ibrahimhs13 | Danish work permit valid until January 2029

PROFILE

Full-stack developer with 5+ years of professional experience owning features end-to-end — from idea and design through to implementation, deployment, and maintenance. Experienced in C# and .NET backends, TypeScript frontends, AWS cloud architecture, and agile delivery. Passionate about code quality, reducing technical debt, and building software that real users rely on every day. Looking for a product-focused environment where the best idea wins and every developer has real ownership — exactly what Dalux describes.

EXPERIENCE

IT Consultant · Folks | B Corp · Copenhagen, Denmark Apr 2024 – Aug 2024

- Maintained and developed the company's web platform in Copenhagen — first professional role in Denmark, English-speaking environment

Assistant Coordinator (Software) – MIS · Transparency International Bangladesh · Dhaka Dec 2023 – Feb 2024

- Owned development and maintenance of web-based MIS modules end-to-end, serving 45+ field offices nationwide
- Built data pipelines and real-time dashboards; authored technical documentation and SOPs for non-technical staff
- Drove CI/CD improvements and contributed to reducing technical debt across legacy modules

Senior Full-Stack Developer · Beximco Pharmaceuticals Ltd. · Dhaka Jul 2022 – Nov 2023

- Led end-to-end development of web and mobile applications used by the nationwide sales force and medical teams
- Took full SDLC ownership: requirements, architecture decisions, implementation, deployment, and support
- Collaborated with Product Managers and Product Designers to balance usability, feasibility, and business value
- Proactively introduced architectural improvements and brought new ideas to improve codebases and development processes

Full-Stack Developer · Beximco Pharmaceuticals Ltd. · Dhaka May 2019 – Jun 2022

- Built and maintained internal software modules, REST APIs, and web portals consumed across departments
- Worked independently and in cross-functional teams — comfortable owning tasks from idea to delivery

Full-Stack Web Developer · Tegra Design · Dhaka Mar 2018 – Apr 2019

- Built client web applications end-to-end; managed production deployments and client training

KEY PROJECT

Voting Platform · github.com/ibs13/voting-platform Jan 2026 – Present

Stack: C# · ASP.NET Core · React · TypeScript · PostgreSQL · Entity Framework · JWT · Docker · AWS

- Full-stack election platform built end-to-end: REST API, TypeScript frontend, cloud deployment, automated build pipeline
- Architected for reliability and maintainability: VoteLock entity for double-vote prevention, JWT fail-fast validation, audit-safe result locking
- Self-service admin dashboard with CSV bulk import and real-time turnout tracking — focused on operator experience

SKILLS

Backend	C# · ASP.NET Core · .NET · REST APIs · Entity Framework · JWT · Node.js
Frontend	TypeScript · React · JavaScript · Tailwind CSS · HTML · CSS · Angular (learning)
Cloud & DevOps	AWS (EC2, S3, RDS, Elastic Beanstalk) · Docker · CI/CD · GitHub Actions · Git
Databases	MSSQL · PostgreSQL · MySQL · MongoDB · Elasticsearch (concepts)

Architecture

Distributed cloud architecture · Event-driven patterns · Agile · End-to-end ownership

Other

PHP · Laravel · WordPress · Android · Technical documentation

EDUCATION

B.Sc. Engineering in Computer Science · Pabna University of Science and Technology

Graduated Dec 2018

CGPA 3.0/4.0 · ACM-ICPC Asia Dhaka Regional Contest participant (2015) · 400+ competitive programming problems solved across LeetCode, HackerRank, Codeforces
